

FORMATS 2011

Formal Modeling and Analysis of Timed Systems

International Conference
Aalborg, Denmark
21-23 September 2011

<http://formats2011.cs.aau.dk>

Timing aspects of systems from a variety of computer science domains have been treated independently by different communities. Researchers interested in semantics, verification and performance analysis study models such as timed automata and timed Petri nets, the digital design community focusses on propagation and switching delays, while designers of embedded controllers have to take account of the time taken by controllers to compute their responses after sampling the environment.

Timing-related questions in these separate disciplines do have their particularities. However, there is a growing awareness that there are basic problems that are common to all of them. In particular, all these sub-disciplines treat systems whose behaviour depends upon combinations of logical and temporal constraints; namely, constraints on the temporal distances between occurrences of events. The aim of **FORMATS** is to promote the study of fundamental and practical aspects of timed systems, and to bring together researchers from different disciplines that share interests in modelling and analysis of timed systems. Typical topics include (but are not limited to):

MT-LAB
A VKR CENTRE OF EXCELLENCE

- *Foundations and Semantics:* Theoretical foundations of timed systems and languages; comparison between different models (timed automata, timed Petri nets, hybrid automata, timed process algebra, max-plus algebra, probabilistic models, type systems).
- *Methods and Tools:* Techniques, algorithms, data structures, and software tools for analyzing timed systems and resolving temporal constraints (scheduling, worst-case execution time analysis, optimisation, model checking, testing, constraint solving).
- *Applications:* Adaptation and specialization of timing technology in application domains in which timing plays an important role (e.g. real-time software, hardware circuits, and problems of scheduling in manufacturing and telecommunication).

Invited Speakers

Rajeev Alur

University of Pennsylvania
Philadelphia, United States

Boudewijn Haverkort

University of Twente
Embedded Systems Institute
Enschede, Netherlands

Oded Maler

VERIMAG
Grenoble, France

Program Committee

Christel Baier

Patricia Bouyer

Marius Bozga

Víctor Braberman

Luboš Brim

Krishnendu Chatterjee

Deepak D'Souza

Manfred Droste

Uli Fahrenberg

Martin Fränzle

Marc Geilen

Radu Grosu

Holger Hermanns

Bengt Jonsson

Kim G. Larsen

Axel Legay

Jean-François Raskin

Jan Reineke

Jiří Srba

Paulo Tabuada

Ashish Tiwari

Stavros Tripakis

James Worrell

Program chairs

Uli Fahrenberg, Rennes, France

Stavros Tripakis, Berkeley, United States

Organization chair

Alexandre David, Aalborg, Denmark

Dates

Abstract submission **15 May 2011**

Paper submission **22 May 2011**

Notification **20 June 2011**

Final version **10 July 2011**

Conference **21-23 September 2011**
